

I got tired of listening to the radio stations that just wanted to atalk talk talk, so I joined the xm radio clan. I found their programing to be outstanding with nothing but uninterrupted music. WOW!!!!!!! Then they introduced the best traffic and weather for my area. I commute in the D.C. metro area and could never get traffic reports fast enough to avoid the problems untill xm traffic started. It's not on the hour, or on the half hour, or even every five mins, it's constantly broadcasting. No wait time for traffic and weather. xm has followed the rules since it's inception and the NAB has no right to interfere with this service for which I pay for. If the other broadcast stations are worried about loosing it's audience then maybe they should consider changing their venue. This is what competition is all about and if they cant run with the xm big dog then they should stay on the poarch and leave xm alone!!!!!!!!!!!! I dont support petition 04-160 and neither should you. Mind your own buisness NAB>
